

The Souterrain record for Aghabullogue Parish and some of the contiguous parishes as of 1977: It will be necessary at a future date to update these lists as of 2021 *et seq* and also to incorporate the souterrain records for other civil parishes within say a 10 km radius of Aghabullogue to get a broader sense of the overall density and cluster orientations of souterrains both residential and ‘worship caves’ connected to the ‘high medieval’ version of the Donoughmore ecclesiastical demesne and also the configurations of its earlier cell and cluain foundations.

This is a listing of some of the civil parishes in the vicinity of Aghabullogue which had known souterrains upto 1977. At a future date I will add the data from more such parishes to give a broader view of the distribution of souterrains and their types surround the core monastery at Donaghmore and within its large demesne of cells and cluains....its Demesne / Estate overtime... The data in question is already available on this website within the list of souterrains by civil parish to be found under Data Tables.
